

Apply – Task 1

Cut out these statements and sort them into three piles:

- Totally true
- Totally false
- It depends

AI needs humans to work properly.

AI will take everyone's jobs.

AI is a powerful search engine.

Chatbots can sound like humans.

Talking to real friends usually makes people feel better than talking to chatbots.

Chatbots can really feel emotions like happiness or sadness.

AI can be a useful tool if it is used carefully.

Using AI too much might stop us thinking for ourselves.

AI can only use information that already exists.

AI is good at making smart guesses based on patterns.

You should always trust answers you get from AI.

AI is already helping people in some ways.

It is normal to feel worried about new technology.

Some people think AI could be used unfairly by people with power.
