

How do banks keep money safe?

Your task is to draw a line between the terms in the left column and their definition. Then draw a logo to represent each of the three terms in the right hand column and draw a line to that.

Computer security

If a bank fails, the government will step in and help out account holders.

Logo 1

Government protection scheme

Rooms with thick walls, strong metal doors and alarms.

Logo 2

Vaults

Encryption that prevents hackers from accessing data, PINs, fingerprints and face ID.

Logo 3
